

The easiest way to lower your electric bill

Introducing **Kilowant ai**
Savings is Your Only Choice

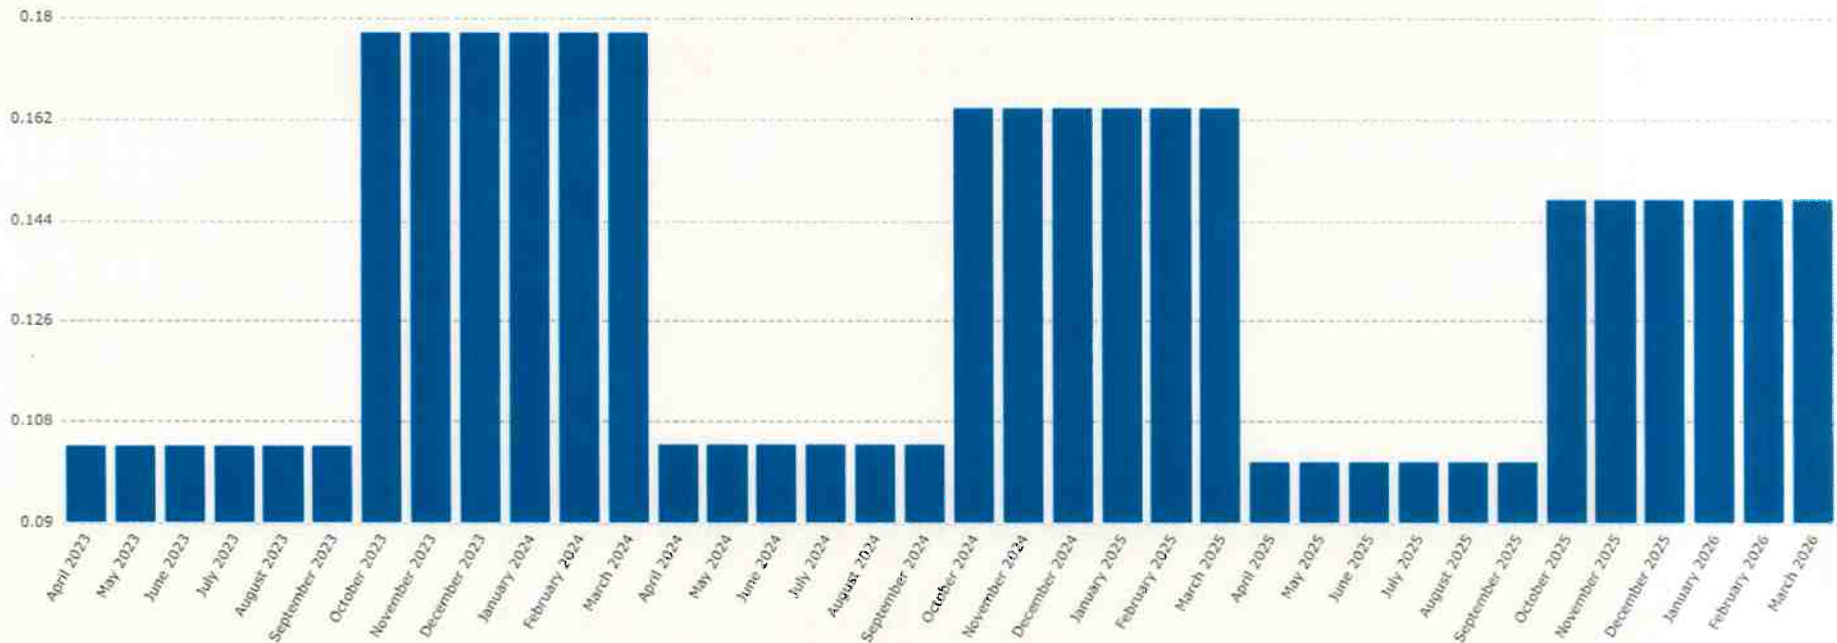

Presented to the Town of Richmond
Presented by James Grasso, Founder

Consumer Challenge #1

How to find alternatives to high energy prices

View Bar Chart ▾

RI Energy: A-16 Basic Residential Last Resort Service: Approved

Consumer Challenge #2

How to figure out which alternative is best

What Consumers Want...

The choice that's in their best economic interest

1. To know they will save money
2. To know how much they will/have saved
3. To spend minimal time and thought getting 1&2

What Consumers Get...

The choice that's in the supplier's best economic interest

1. Limited choice of price terms...1-3 **static offers** vs. 36+ **dynamic**
2. Deceptive sales practices...price **reduction** sold as **savings**
3. No savings analysis...zero transparency and accountability

Alternative 1...Let your state shop

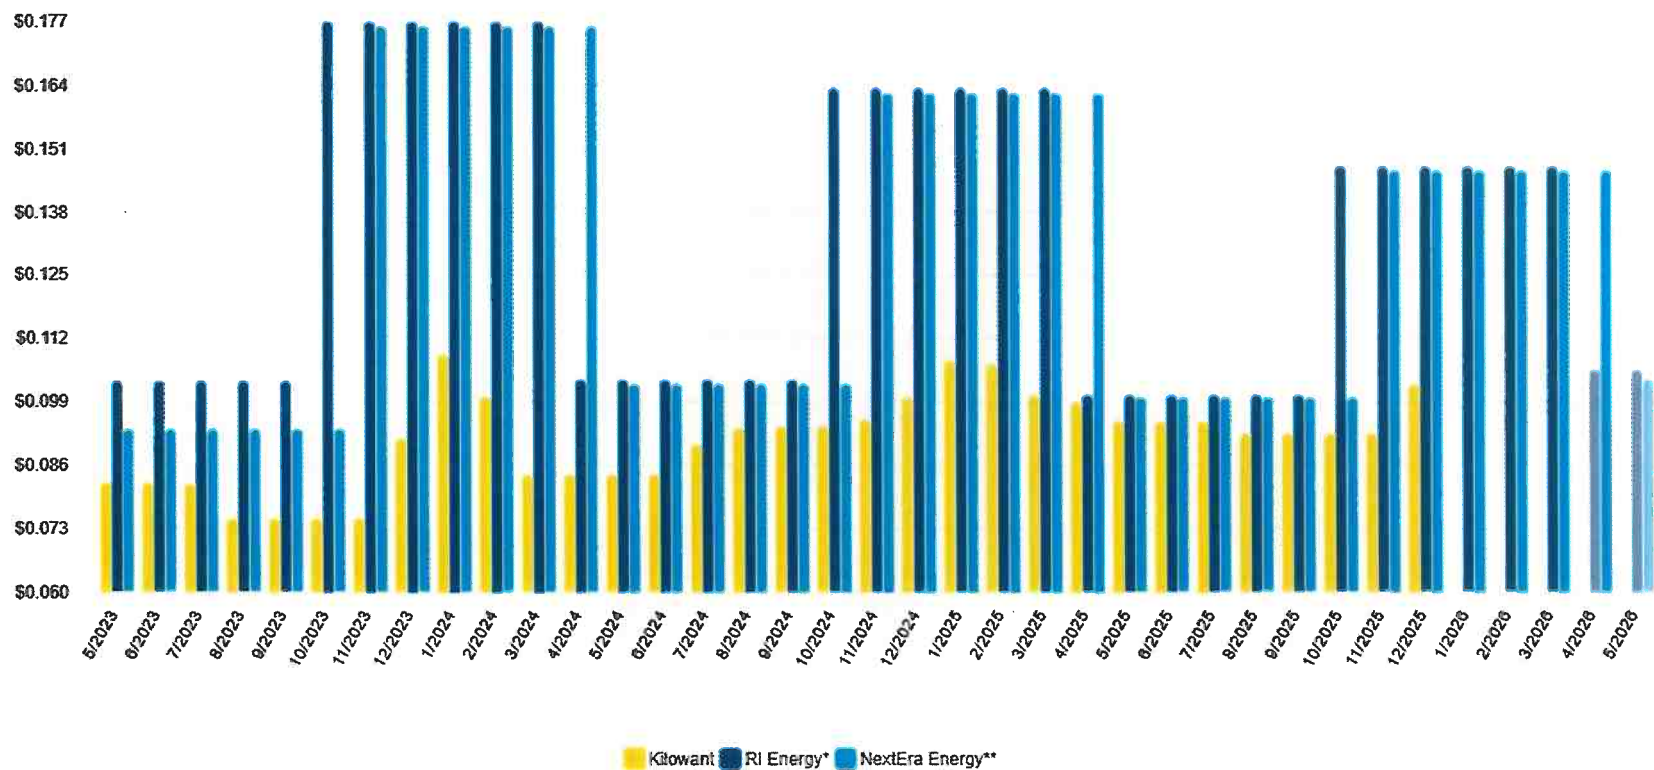

"Learned by getting burned" approach

 Company Info	Meets state-mandated renewable energy standards	13 months	13.19¢	\$98.93	\$11.85 savings	N/A
 Company Info	✓ Exceeds state-mandated renewable energy standards	6 months	13.3¢	\$99.75	\$11.03 savings	100%
 Company Info	✓ Exceeds state-mandated renewable energy standards	12 months	13.5¢	\$101.25	\$9.53 savings	100%

Source: ripuc.ri.gov

Alternative 2...Let your town shop

Save 2% vs. Utility, Lose 20% vs. Market

* RI Energy Last Resort Service rate beyond Mar. 2026 is estimated and subject to adjustment ** NextEra Energy supply rates beyond Apr. 2026 are estimates and subject to change with market conditions

Alternative 3...Let ai shop and manage

Chooses only price plans with savings
